

A community donation protocol with a sell-only token.

People donate USDT to support mutual aid. Tokens are released slowly. Anyone can sell MAVRIC for USDT.
Buying on our DEX stays blocked until treasury holds $\geq 5,000$ MAVRIC and admin lists / opens buy.

Fixed supply 10,000

Ticker MAVRIC · BEP20

Min donation \$10 USDT

Not an investment product

Read this first.

Donations support community mutual aid. They do not guarantee profit, price, or returns. This paper explains the live rules.

FOR EVERYONE

How it works in five steps

1

Connect

Any Web3 or DEX wallet on BNB Smart Chain.

2

Donate

\$10+ USDT · 5% charity · 5% platform · 90% to the pool.

3

Receive slowly

20% of the 90% each month, for 10 months (2x cap).

4

Community extras

Inviter, matching, rank — 50% USDT + 50% MAVRIC, 3x cap.

5

Exit if you wish

Sell MAVRIC to USDT only. Burn 5-15% by impact. 10% daily sell cap.

VISION & SCOPE

Earn through contribution. Exit through a transparent pool.

In scope

USDT donations, five AirDrops, 20-level matching, 11 ranks, sell-only AMM, charity/platform fees, wallet connect, live sell rails.

Out of scope

Promised price or return, public buy before treasury $\geq 5,000$ MAVRIC and admin listing, lending or yield products, minting above 10,000, hiding treasury as circulating, using treasury to pump the chart.

FIVE AIRDROPS

Passive is yours. Community extras share a 3x cap.

Passive

Donor only. Default 20%/month of 90% effective for 10 months (2x cap).
Passive Airdrop Booster: 30 days, 5 x \$1,000 (\$5,000) -> lifetime; each renewal 25% x 8. Renewal Passive Airdrop Booster after first 20x10 complete. Hourly accrual, monthly claim. MAVRIC from the Passive Vault.

Inviter

7% of GROSS (10% booster if you donate \$100+ and refer 5 x \$100+ members in 10 days). Immediate USDT + MAVRIC claim from Community Vault.

Matching

Up to 50% of team monthly AirDrop. Refer 1 x \$100+ contributor per 4 levels; 5 open all 20. L1 directs only.

Rank

Spark 3% through Ruler 50% (Genesis spelling). Team monthly AirDrop x current rank % only. Not stacked. 60/40 legs.

Free

\$20 credit per direct. Unlock \$5 per each full \$100 they donate. 50% USDT + 50% MAVRIC. Claim 85/7.5/7.5. Not 3x capped. Telegram required.

Vaults

Community Vault is 50% USDT + 50% MAVRIC. Default 3x personal donation; Capping Booster \$5,000 -> 5x lifetime. Free is 50/50 and separate.

MAX PROTOCOL CREDIT

Ceilings in USD-value at generation — not a cash guarantee.

PERSONAL DONATION	PASSIVE 10 MO	COMMUNITY 3X	STACK BEFORE FREE
\$100	\$180	\$300	\$480
\$1,000	\$1,800	\$3,000	\$4,800
\$5,000	\$9,000	\$15,000	\$24,000
\$10,000	\$18,000	\$30,000	\$48,000

TOKENOMICS

Fixed cap 10,000. Circulating is not the whole pie.

AMM at launch	2,000 · 20%
Treasury — not circulating	7,600 · 76%
Development team	200 · 2%
Marketing — same vest	200 · 2%

Circulating = 10,000 - treasury - locked team - locked marketing - burned.

LIQUIDITY & SELL RAILS

AMM formula: MAVRIC x USDT = k

- 01 Launch 2,000 MAVRIC x 500 USDT, $k = 1,000,000$, listing \$0.25. Donate is the only public bid until listing.
- 02 Sell MAVRIC to USDT is open. Buy USDT to MAVRIC waits on treasury $\geq 5,000$ MAVRIC and admin listing.
- 03 USDT out of a sell: 90% wallet, 5% platform, 5% charity.
- 04 Burn starts at 5% and rises to 15% when pre-split impact is high (~20% impact maps to 15% burn).
- 05 Large sells auto-split into slices of about 2% of the MAVRIC jar.
- 06 Each vault: max 10% of available claim per day. Remainder stays until tomorrow. Never Treasury.

LIVE RULES

This paper describes the live app.

- 01 Live now: donate, five AirDrops, matching, ranks, sell-only DEX, wallet connect, 10% daily sell cap, auto-split, 5-15% burn.
- 02 Team + marketing vest: locked until month 6, then +10 each, then +10 each every 3 months through month 63.
- 03 Donate to participate. Receive slowly. Sell if you need to. Never buy MAVRIC on our market until treasury listing opens buy.

Read this first.

MAVRIC is a community donation utility on BNB Smart Chain. It is not an investment, security, or profit scheme. Digital assets can lose value. Fees, burns, and AMM math change the USDT received if you sell.
